

MAAC.CA Help

I did not receive my account activation email

1. The account activation email this is sent after you register an account on the MAAC website is an automated email sent by the MAAC.ca web server. Some email programs see an automated email as potential SPAM email and flags it as such. Make sure to check your SPAM folder to see if the email has accidentally been flagged as SPAM mail.
2. Add the 'maac.ca' domain name to trusted email senders in your SPAM engine's white list.
